## SolarWinds | UX Designer

JUNE 2017 - CURRENT | Brno, Czech Republic

- Defining the project goals and KPI metrics in close cooperation with a Product Manager, Develop Lead and with our researchers.
- Developing detailed wireframes and pixel-perfect prototypes to explain feature concepts and define user interactions and flows.
- Identifying usability issues and maintained usability backlog of MSP Manager and provide design guidelines to improve them.
- Presenting ideas to key stakeholders and development teams to establish a common understanding.
- Contributor for SolarWinds design system and design language.
- Cooperating with researchers, defining the test scenarios, measuring metrics and iterating on design based on user feedback.
- Developing interactions / motion concepts in HTML/CSS or in Principle.
- Team work with other UX Designers on big features.
- Proactively doing a design QA across multiple development teams from different time zones.
- Striving motion implementation to provide a delightful experience.

## SolarWinds | UX Associate Designer

JUNE 2016 -JUNE 2017 | Brno, Czech Republic

- Documenting the style guide and creating a pattern library.
- Cooperating with Seniors designer on bigger projects.
- Transferring PM's vision into the best possible User interface while being under certain limitations (time, scope, feasibility).
- Working with Scrum agile team and delivering design solutions fast as possible for being able to satisfy monthly release plan.

## Freelance Product designer | Webdeveloper and Graphic designer

2010 - CURRENT | Brno, Czech Republic

- Responsible for the whole design process and project management.
- Preparing project estimations, timelines and documents for kick-off meetings.
- Managing team of 3-5 people depending on project size.
- Transferring client's requirements through user need into Lo-Fi wireframes and Hi-Fi mockups and reviewing them on a weekly basis.
- Delivering pixel-perfect designs with prepared guidelines for Front-end team.
- Setting up Analytics and doing research and usability testing on my own
- Providing support and keeping eye on design quality during the implementation.
- Besides UX / UI for web applications, I've done other types of creative/visual work such as graphic design for billboards, car wrapping, logos, posters, branded shop windows, and email campaigns.

**The project I am proud of****GORDIC**

UX for the main company portal and UX/UI for support portal.

**NTSUP**

Redesigned company brand and designed more than 150 graphic items.
